

European Platform for the Responsible Use of Medicines in Animals

EPRUMA welcomes European Parliament Plenary move to protect animal health and welfare

Brussels, 16 September 2021: Despite sustained attempts by some MEPs to undermine the scientific assessment of the EU's agencies, the plenary vote yesterday showed MEPs' support of the EU's One Health approach to addressing the challenge of antimicrobial resistance.

In a unanimous/close/majority vote, members of the European Parliament voted to ensure that veterinarians retain access to specific life-saving treatments for both farm and companion animals by respecting the criteria for the designation of antimicrobials to be reserved for the treatment of certain infections in humans as advised by the European Medicines Agency, and supported by EU Member States.

Rejection of the motion for a resolution has demonstrated that MEPs have understood the importance of animal health and its knock-on effects on public health, food safety, food security and the environment.

EPRUMA now looks to the European Parliament to support the implementation of wider EU policies affecting animal health and welfare, building on the scientific advice of the EU's agencies, and seeking a careful balance for the protection of human and animal health, as well as our environment.

Notes for editors:

EPRUMA is a multi-stakeholder platform linking best practice with animal health and public health. It aims to ensure best practice through responsible use of medicines in the prevention and control of animal diseases.

EPRUMA partners:

- AnimalhealthEurope: The voice of the animal medicines industry
- COPA-COGECA: European Farmers and Agri-Cooperatives
- Diagnostics for Animals
- EGGVP: European Group for Generic Veterinary Products
- FECAVA: Federation of European Companion Animal Veterinary Associations
- FEFAC: European Feed Manufacturers Federation
- FESASS: European Federation for Animal Health and Sanitary Security
- FVE: Federation of Veterinarians of Europe

Associate partners (National Responsible Use platforms):

- AMCRA: Centre for Expertise on Antimicrobial Consumption and Resistance in Animals (Belgium)
- RUMA: Responsible Use of Medicines in Agriculture Alliance (United Kingdom)
- SDa: Veterinary Medicines Institute (The Netherlands)
- VETRESPONSABLE: Platform for the Responsible Use of Medicines in Animals (Spain)
